## Automatic Blanket Wash Brush Rollers

**Manufacturer Part #**

**Description**

S8.205.030 F/02 (old)  
MV.033.091/02 or  
MV.040.336 (new)

Speedmaster 102, 3.300" finished O.D. X  
43.688" OAL (40.555" brush face length)  
Bearing Outside/Eccentric Inside

81.205.101F/03  
81.205.103F

Speedmaster 102, 3.30" finished O.D. X  
44.103" OAL (40.938" brush face length)  
Eccentric Outside/Bearing Inside

MV.025.694/01 (old)  
C6.204.012F (new)

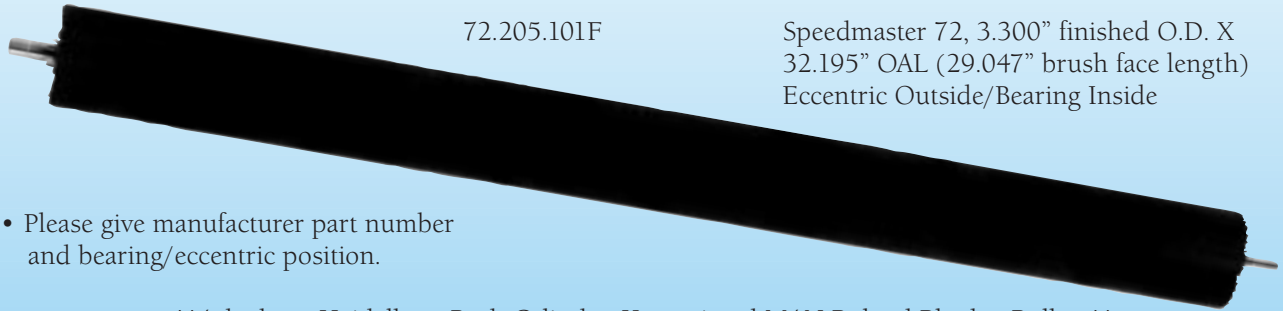

Speedmaster 102, 3.400" finished O.D. X  
44.750" OAL (41.250" brush face length)  
Eccentric Outside/Bearing Inside

72.205.101F

Speedmaster 72, 3.300" finished O.D. X  
32.195" OAL (29.047" brush face length)  
Eccentric Outside/Bearing Inside

- Please give manufacturer part number and bearing/eccentric position.

## Sheet Cleaner Brushes

*Send us your existing brush and we will refill with new material. The sheet cleaner brushes can also be made new if required.*

Superior Part #	Manufacturer Part #	Description	03111, 03112, 03113, 03114
03111	Doyle Sheet Cleaner	Refill Aluminum Block X .008 Crimped Black Nylon Fill X 7/8" Trim	
03112	Doyle Sheet Cleaner	Refill Aluminum Block X .004 Crimped Natural Nylon Fill X 7/8" Trim	
03113	Doyle Sheet Cleaner	Refill Aluminum Block X .008 Crimped Black Nylon Fill with .003 Brass X 7/8" Trim	
03114	Doyle Sheet Cleaner	Refill Aluminum Block X .004 Crimped Natural Nylon Fill with .003 Brass X 7/8" Trim	
MBS-82	Herbert Static Control	Strip Brush, .812"- .4375" Beveled Trim X 41" Long X .003 Level Brown Nylon Fill	
02290	Herbert Static Control	Strip Brush, .625"- .375" Beveled Trim X 35" Long X .006 Crimped Black Nylon Fill	

## Automatic Blanket Cleaner Cloth Rolls

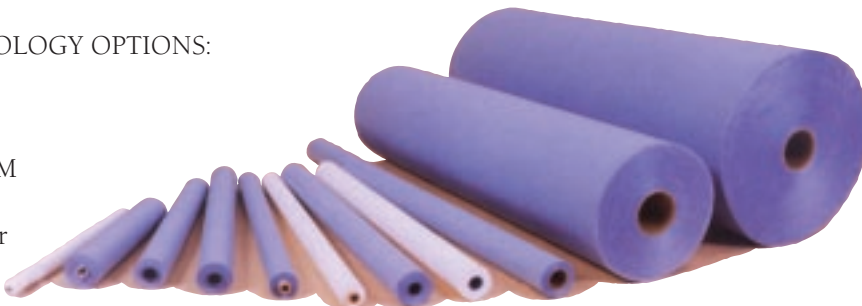

K  
2

We supply blue and white blanket cleaner cloth rolls to fit every cloth type blanket wash system, cylinder cleaner, chill roll cleaner and plate cleaner in your plant. We supply products for these and other presses: Akiyama, Harris, Heidelberg, Koenig & Bauer, Komori, Man Roland, Mitsubishi, Planeta, Shinohara, Toshiba; in 500 meter rolls and in mini-rolls per the OEM spec. Our special white cloth for QM-DI presses is the best value available. Call us to discuss your needs!

MAKE YOUR CHOICE FROM OUR TECHNOLOGY OPTIONS:

- **Dry Cloth** from leading manufacturers
- **ICS Pre-Soaked Cloth** vs. high cost OEM product; call us to take advantage of our "Performance Guarantee" that will deliver cost savings or your money back!
- **NEW Abrasion Resistant Dry Cloth** for perfecting cylinders

## Bearer Wipes for Offset and Web Presses

We supply custom-made bearer wipes for many popular offset and web press models. When you call to inquire, please advise us of the length / width / thickness / # of holes (if any). Minimums apply to all orders for this material. To insure our performance vs. your specification, please supply a sample so we can deliver a perfect match. We can also supply gray Ink Divider Felts to your specification or to a sample.

## Blanket Wash Up Felts

Our high quality absorbent felt pads are produced to the OEM size and thickness specifications for use on Heidelberg Quickmaster 46 and 46 DI. We would be pleased to offer you a custom size based on production minimums and the receipt of your sample to insure proper replication.

## Hickey Picker Sticks and Replacement Tips

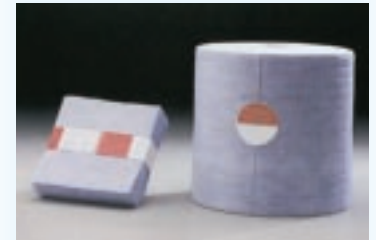

We supply conventional and alcolor hickey sticks and/or replacement tips for popular press models such as Heidelberg, KBA, Planeta, Komori, Miller, Shinohara, Sakurai, Ryobi, ManRoland, Mitsubishi, Akiyama and Miehle. Our replacement product designs and manufacturing process optimize performance on your press. When you call to inquire, please identify your press type and the dimensions if you are not aware of our specific part number.

## Lint-Free Shop Cloth Pads and Wipes

Increasing requirements for lint-free cleanliness and environmental control within the pressroom have given rise to new standards for shop cloth and cloth wipe products. Our full line of pads and cloths combine the feel and durability of cloth towels while delivering lint-free performance. Call us to inquire about this advanced product that sets new standards for softness, absorbency and durability.

## Disposable and Reusable Pressroom Gloves

To insure the safety of your pressroom personnel, we supply a range of gloves for different tasks that optimize the balance of cost and performance. We can provide disposable gloves in both PVC and nitrile rubber, as well as reusable gloves in nitrile and heavy duty PVC. Please call to discuss your particular requirements and let us save you money!

**Our cleaning products save you time and money!**

## Blanket Scrubber

An open ended nylon packet with a Cellulose sponge that holds excess solvent. You can reduce laundering bills by using the scrubber over and over again by rinsing it clean after each use.

## Natural and Synthetic Sponges

Our natural sponges are sorted for size and quality, then pre-washed to protect plates and blankets from foreign particles. For general use in pre-press and the pressroom. For a lower cost alternative, try our synthetic sponges.

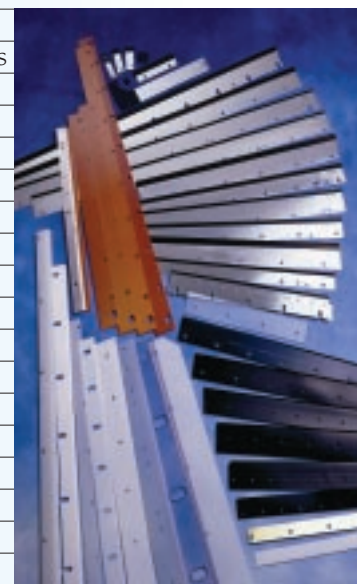

## Wash Up Blades

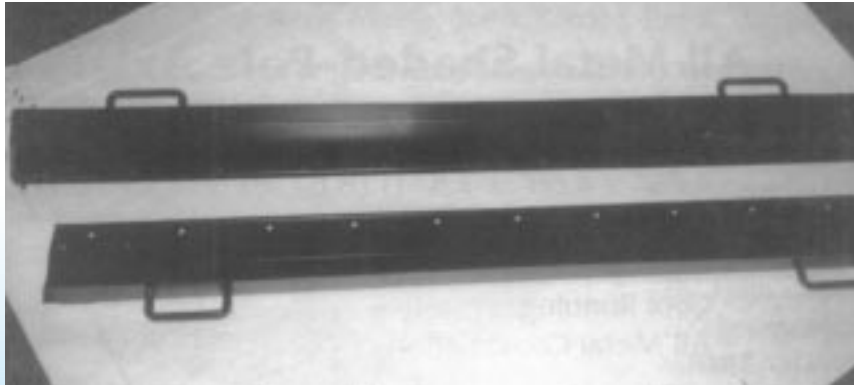

Wash Up Blades are available for Akiyama, Hamada, Hantscho, Harris, Komori, Man Roland, Miehle, Miller, Mitsubishi, Planeta, Ryobi, Sakurai, Shinohara, and most other presses from our Extensive Stock. If you don't see what you need, please call us!

Superior Part #	OEM Part #	Press Type
1280-1	01.006.105	KOR and KORA
1280-2	68.010.180/01J	SORMZ/Speedmaster 72 - standard
1280-7		SORD-Z (Old Style) 2 x 37-3/4" 2 lg/12sm holes
1280-9	9E.010.415S	Heidelberg Web 16
1285-5	58.010.180/C	SORK (Old Style) 2 x 28-3/8" w/12 holes
1285-6	68.010.180/D	SORM(Old Style) 2 x 31-1/16" w/12 holes
1285-7	38.010.180/B	KORD 62
1290-2	42.010.180/F	GTO-46
1290-3	69.010.180/C	GTO-52
1290-4	58.010.180/01K	MO/SORK Standard
1290-5		SORD-Z 2-3/8 x 37-3/4" w/10 holes
1290-10	53.205.033/01C	MO Blanket/Standard
1290-18		Speedmaster 52
1300-1	41.010.180	SM 102/SORS (same as 1290-1)
1300-2		SM 102/SORSZ Drupa 1-9/16 x 41-7/16"
1300-3		SM 72/SORM/SORMZ Drupa 1-9/16 x 29-5/8"
1300-14	81.205.123/02	SM 102 Autowash/New HDM
1300-15	72.205.123/02	SM 72 Autowash/New HDM
1510-1	01.006.105	10 x 15 Platen Press
1510-5	A1.203.066/01	Quickmaster 46

**Wash up blades are available for all presses!**

## Wash Up Trays

- Manufactured from heavy gauge steel
- Guaranteed to fit and replace your original equipment sludge tray
- Trays and support bars available for Speedmaster 72, 102 and 102CD presses
- Don't have a 72 or 102? Send us your tray and we can make replacements for your press

## Wash Up Bottles

- LDPE bottle complete with cap assembly
- Wide mouth caps and nozzles are molded in one piece to prevent leaking
- Available in 16 and 32 oz. With red, blue, yellow, green or clear caps

Superior Part #	Size	Bottle Color
WB 1600	16 oz.	Natural/clear
WB 3200	32 oz.	Natural/clear

## Clean Up Sheets

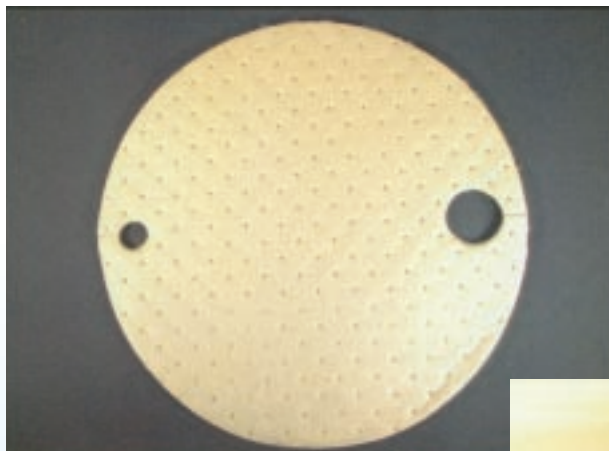

Available for all major duplicator and small press models, they remain the most economical way to clean your rollers. We supply the sheets cut and trimmed to meet your requirements and in three finishes: Pin bar / Straight cut / Slotted. This product, under normal operating conditions, typically provides lint free performance. 100 sheets per package / Master Cartons are available on custom order.

**Our quality clean up supplies save time and money!**

Quality • Service • Value

## Sorbents

*Keeps the area around your equipment safe and clean. Our highly absorbent pads and socks soak up industrial oils, process water and other spills.*

---

### ABSORBENT SOCKS

---

*Select from our oil only and general purpose varieties; the quickest way to clean up all types of leaks and spills around the plant.*

---

### ABSORBENT PADS & ROLLS

---

*Pads available for oil only and general purpose; pads and rolls available for oil only; perforated and anti-static varieties of oil only pads available.*

---

### ABSORBENT BARREL TOP PADS

---

*Available in oil only and universal varieties; pre-cut bung holes fit evenly on drum surface to insure cleanliness and drip protection.*

---

# Mindermate™ Ink Wash Up System

Have you wished for a system that would give your pressmen the same quick change advantage that you have with Ink Fountain Liners for your Ink tray? Well, here it is . . . MINDERMATE™.

This unique, low cost alternative to messy wash-up methods used by most pressmen will deliver immediate cost reduction and employee safety benefits with measurable up time improvements! New levels of operational efficiency and cleanliness in your plant are available now from Superior!!

The patent protected Mindermate™ system is SIMPLE and EASY to use. Part one is a disposable wash-up tray liner that fits into a special support tray. The tray with liner fits into your existing press wash-up tray. The lead edge of the liner “snaps” into a modified ink wash-up blade that replaces your existing blade. Roller ink waste collects in the liner and when its full, it is safely and cleanly removed for easy disposal.

## MINDERMATE™ SYSTEM BENEFITS:

- Reduced employee contact with ink and harmful solvents
- Your in-plant environment improves with less solvent use
- Overall cleanliness of the press area improves with ease of disposal
- Press down time is reduced dramatically
- Expense for ink rag use is significantly reduced

## TYPICAL RETURN-ON-INVESTMENT

The following example is based on a 5-color Heidelberg SM 102 press and assumes a press cost rate of \$250.00 per hour.

Please enter your information in the column (right)		Your Data		Example	
Typical 5-color Heidelberg SM 102 wash-up tray cleaning		Cost	Time Hrs.	Cost	Time Hrs.
Time to empty and clean 5 trays at 10 mins. per tray is 50 mins: . . . . .				\$208.00	0.83
Recycled rags used = 15 @ 5¢ per rag = 75¢ per tray: . . . . .				\$3.75	
Total cost per wash-up: . . . . .				\$211.75	
Assuming trays are emptied and cleaned every week, annual cost is: . .				\$11,011.00	43.16
Typical 5-color SM 102 wash-up tray cleaning with Mindermate™		Cost	Time Hrs.	Cost	Time Hrs.
Time to remove and dispose of 5 full liners and replace with new liners at 5 mins. per tray is 25 mins: . . . . .				\$104.16	0.42
Cost of Mindermate™ liners used = 5 @ \$8.66 each: . . . . .				\$43.30	
Total cost per wash-up: . . . . .				\$147.46	
Assuming liners are replaced every week, annual cost is: . . . . .				\$7,667.92	21.84
<b>Estimated annual savings with Mindermate™</b> . . . . .				<b>\$3,343.08</b>	<b>21.32</b>
If the cost of Mindermate™ for a 5-color SM 102 is \$746.50 (2006 list price)					
The Return-On-Investment calculation would be:					
Purchase Price - \$746.50					
Annual Savings - \$3,343.08 = 0.22 years = 2.5 months. Plus an additional 21.32 production hours available annually.					

Save time, money and the environment!

## ICS Pre-Soaked Wash Cloth Rolls FOR OFFSET & WEB PRESSES FROM SUPERIOR

If you are dissatisfied with the performance and cost/benefit ratio of your current wet wash cloth, or if you still use dry cloth and would like an alternative that eliminates wrestling drums of wash and needing duplicate chemical inventory when you can change ink systems to UV or hybrid types, Superior Press Parts has a proven alternative for you!

Superior has partnered with the manufacturer of a newly introduced, patent-protected product that works for sheet fed and web presses running all ink systems. We have documented and tested our product in head-to-head trials, using roll life on press as a key performance attribute. We have never been outperformed on a press by competition, with our improvement in extending roll life measuring up to **2 times** as long as competition. Our customers also performed fewer cleaning cycles to get their desired result vs. competition, with the decrease in cycles ranging from 50-66% fewer cycles, delivering real value for the money. This outstanding performance also comes without the common failing of competitive material in leaving too much moisture on the blanket that blinds plates and often requires extra effort to return the blanket to the dryness necessary to print effectively.

**We are so confident in our new product that we offer a “Performance Guarantee” that promises that your first box of our ICS product will extend the roll life on press while delivering measurable improvement in quality and lowering the amount of cleaning cycles needed to demonstrate the improved cleaning results you need to be competitive in today’s market.**

Our ICS cleaning product rolls contain less than 2% V.O.C. (25 grams per liter) or regulated chemicals and require no solvent spray. When our product is used on your sheet fed or web press, you have new freedom to use conventional, UV, and/or UV/hybrid ink systems, without having to have duplicate chemical inventory or different wash rolls to handle that ink. The ICS product roll does it all!

Please call us today to begin your transition to the **ONLY** product that gives you these benefits:

- Lowest V.O.C. chemical exposure in a performance material - **SAFETY**
- Cleans better - Lower spoilage and better print quality - **HIGHER PROFITS**
- Works with all ink systems - No need for extra inventory - **CASH FLOW**
- Each roll lasts longer on press - Fewer changeovers - **LOWER COST OF USE**
- Our cleaning liquid is bio-degradable - No impact on waste system - **SAFETY**

When you call, please tell us the following to insure a trouble free changeover. What is your press type and model, the length of cloth on the roll you use now, the diameter of a new roll of your current cloth (measure across face of roll end), the OD of the core of the cloth roll you use currently, and the manufacturer’s part number of the cloth roll you use now?

Once we get you started on the road to improved performance and profits using our rolls, we can also help you with our proprietary replacement bladders. They outperform the OEM bladder in your system now because we use higher end elastomeric materials and make our bladder thicker in the wall sections, which translates into Superior performance in use. Call us for the specifics of our Performance Guarantee and start saving money and time!!

**Saving you money in your cleaning system starts with a call . . . 1-800-332-4492!**
